## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-21, drawn to an apparatus, a jet mill, classified in class 241 and subclass 39.

Group II. Claims 22-26, drawn to a process for comminution of a powdery material, classified in class 241 and subclass 1.

Inventions of Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus of Group I as claimed can be used to practice another and materially different process and not necessarily the specific process of Group II. For example, the jet mill of Group I can be used to comminute non-powdery material.

### ***Conclusion***

A telephone call was made to the attorney of record, Rodney T. Hodgson, on February 8, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this

requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
